PROFESSIONAL SUMMARY

Final-year BSc Creative computing student at Bath Spa University (RAK Campus), graduating 2026, with 20+ shipped projects spanning full-stack web, Android, machine learning, and game development. Proficient in the MERN stack, Kotlin, Python, and Figma — with proven experience building secure authentication flows, REST API integrations, real-time ML interfaces, and offline-first mobile apps. Delivered freelance solutions for two UAE-based clients, including a live e-commerce platform and a high-impact digital campaign that generated qualified investor leads. Seeking a junior full-stack or frontend developer role where I can contribute production-ready code from day one.

EXPERIENCE

Full-Stack & Software Developer | University & Freelance Projects

2023 – 2026

Glowing — Premium Skincare E-Commerce Platform (MERN Stack)

- **Architected** a full-stack e-commerce platform with JWT + Google OAuth authentication, a RESTful product and cart API, and end-to-end PayPal Sandbox checkout — deployed to Vercel with sub-2-second load times.
- **Designed** a responsive, mobile-first UI in Figma then implemented it in React, achieving consistent cross-browser compatibility across Chrome, Firefox, and Safari.

Credit Card Fraud Detection System (Python · scikit-learn · Gradio)

- **Built** a machine learning classification model achieving 97% accuracy — deployed with a live Gradio interface allowing real-time transaction prediction without any backend setup.
- **Engineered** feature engineering and model tuning pipelines that reduced false positives versus a baseline logistic regression model.

Android Mobile Applications (Kotlin · Jetpack Compose · Room DB)

- **Developed** 2 production-ready Android apps with offline-first architecture using Room Database — enabling full functionality without an active internet connection.
- **Implemented** MVVM architecture and Jetpack Compose UI for clean, maintainable, and testable codebases.

Bel3zza — Makeup Business Website (HTML · CSS · JavaScript)

- **Built** a 4-page responsive website for a real UAE-based makeup client — delivered from brief to launch with no frameworks, using pure HTML, CSS, and JavaScript.

2D Side-Scroller Game (Unity · C#)

- **Designed** and shipped a 2D platformer to itch.io with custom physics engine, collision system, and parallax scrolling — handling the full game loop from design to deployment.

Advertising & Brand Designer | Prime Marketing & Construction

2024 – 2025

- **Spearheaded** the end-to-end digital identity for the 'Prime Arcade' property launch — producing 30+ branded visual assets and a full social media content architecture from scratch.
- **Designed** and deployed targeted content templates and campaign strategies that converted social media engagement into verified investor leads, earning a Certificate of Appreciation from senior management.

EDUCATION

BSc Creative Computing — Web Design & Development

2023 – 2026

Bath Spa University Academic Centre, RAK · Final year, graduating 2026

High School Diploma

2009 – 2022

New Indian Model School, Sharjah

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Kotlin, C#, Node.js, HTML5, CSS3, SQL

Frameworks & Libraries: React.js, Express.js, Jetpack Compose, scikit-learn, Gradio, Tkinter, Matplotlib

Databases & Cloud: MongoDB Atlas, Firebase, Room Database, MySQL, Cloudinary, Vercel

Tools & Workflow: Git, GitHub, Figma, Android Studio, VS Code, REST APIs, JWT, OAuth 2.0, Unity

Design & Other: UI/UX Design, Responsive Design, Agile Workflow, PayPal Sandbox Integration

CERTIFICATIONS & AWARDS

Certificate of Appreciation — Prime Marketing & Construction

May 2025

Awarded for outstanding performance in the 'Prime Arcade' digital campaign — generating qualified investor leads through strategic brand and content execution.

Responsive Web Design — LinkedIn Learning

2023 – Present

UI/UX Fundamentals — LinkedIn Learning

2023 – Present

Database & Python Essentials — LinkedIn Learning
